

ARROWHEAD INTERNATIONAL, INC.
WORLD LEADER IN AMBIENT TIRE RECYCLING SYSTEMS

HELPING YOU BECOME THE SOLUTION

HELPING US ALL SAVE THE EARTH

AMBIENT TIRE RECYCLING SPECIALISTS

Our Mission

The executive management team of Arrowhead international, Inc. is long on experience. Alan Ulrich, President and founder of the company, has over 34 years experience in tire recycling industry. He founded Arrowhead with the goal of offering the most advanced systems available today. We are committed to keeping the company at the forefront of the tire recycling industry by working together with hands on tire recyclers. We help you help the environment!

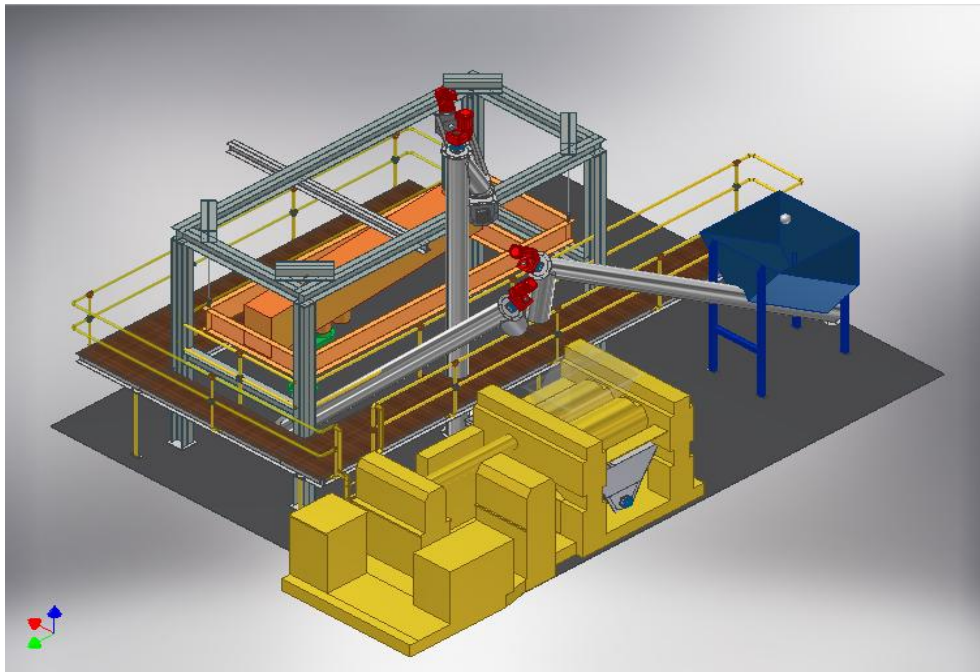

TURN-KEY AMBIENT TIRE RECYCLING SYSTEMS

Specializing in fine grind systems 10-40 (0.2mm-2mm) mesh using cracker mills. We offer installations any where in the world.

Arrowhead International, Inc. has possibly the finest crumb rubber fine grind systems in the world. The system is very compact, efficient, and designed for high throughput and low maintenance. The final crumb product meets ASTM specifications. Installation supervision and on site training is available.

Individual cracker mills sold or complete systems.

FINE GRIND SYSTEM: 4mm chips reduced 0.2 mm-2mm CRUMB

Fully automated system lowers manpower required and increases throughput. Automated start-up sequence and automated shut down. Whole system monitoring with safety interlocks to keep you running.

**All cracker mills are made at our factory, in the USA, by Arrowhead employees. Field service technicians to service your system.
Installation and start up supervision
Training of your employees in the operation and maintenance of the equipment.**

NEW TWIN DRIVE ROLLER BEARING CRACKER MILLS

We are the only company offering a two roll Anti-friction roller bearing cracker mill
Low energy consumption. Higher throughput. Lower operating costs.
Recirculating oil system eliminates the high cost of grease lubrication!

“ THE CHIEF” CRACKER MILL

ROLLER BEARINGS

There is only one “**CHIEF**”, the rest are followers. Arrowhead’s **CHIEF** is probably the most technologically advanced cracker mill in the world. It can has a throughput of 2.2-2.8 tons per hour of 10-30 mesh (0.6- 2mm) No one else comes close to this volume.

NEW SPARE ROLLS made to order, lowest prices, fast delivery

Our rolls are hollow cast chilled iron and precision ground. We can make them according to your prints. We can cut most corrugations patterns to match yours.

TIRE FIBER RECYCLING: turning a liability into an ASSET

Arrowhead is the first company in the world to offer a fiber cleaning system. Up to 70%, by weight, of the fiber is crumb rubber. Of an average 2000 tons of fluff is generated, of which 1400 tons is crumb rubber. That is almost \$500,000 in revenue generated from the reclaimed crumb. Cleaned fiber is highly marketable and sells for as much as \$1000/ton! That's another \$500,000 generated revenue.

SHREDDING AND GRANULATING

We offer turnkey shredding and granulation systems to reduce whole tires down to 5mm chips. We offer systems with a choice of 2 tons or 2.5 tons per hour.

HYDRAULIC COMPRESSION MOLDING PRESSES

Arrowhead also sells new and rebuilt hydraulic presses to mold your parts. Any size made to order or choose from one of our rebuilt presses. New hydraulic systems and new control systems are provided with all presses.
